

## RESOLUTIONS

### Intra Spectral Imaging System

#### Tutorial for ISIS Print.

The manufacturers & distributors of the ISIS software take no responsibility for, nor make any claims in connection with ISIS. This program is a research tool and whilst interesting anomalies have been seen they have not yet been validated by clinical trials.

The manufacturers of the ISIS software make no claims as to its suitability for any particular purpose. It is a flexible system that is designed to work with many external devices, but no guarantee is given for reliability or compatibility with any particular computer or device.

ISIS is not intended for the purpose of diagnosing physical problems and does not take the place of medical diagnosis. Anyone with a health problem is strongly advised to see a medically qualified practitioner.

#### How to use this document:

##### PDF document:

If you are using Acrobat reader, just click on the links as per the html document.

##### HTML document:

The html help file can be browsed using Internet explorer or any other web browser. All subjects listed in the contents have 'hyperlinks' to their relevant chapters. You can also use the 'Back' button to jump back to the subject you last looked at.

##### Create a PDF document

#### ISIS Print Tutorial

##### Part 1: Installing and operating the ISIS Print software.

##### System:

##### System requirements:

NOTE: ISIS Print will only run on a computer that already has ISIS Pro2 installed.

##### Minimum System Requirements

##### Hardware:

CPU: 500 MHz

Memory: 128Mb

Hard Drive: 20 GB

Video: 24bit 32mb graphics card

Video capture: PCI capture card 720 x 576 resolution.

Video interface: PCI slot

CD drive

##### Software:

System: W98.

DirectX9

Video settings: 800 x 600 24bit colours

##### Recommended System Requirements

##### Hardware:

CPU: 1800 MHz or higher

Memory: 512Mb

Hard Drive: 60 GB or larger

Video: 128mb graphics card

Video capture: DV via FireWire

Video interface: FireWire

DVDW or CDRW drive

##### Software:

System: WXP or W2000 with ISIS Pro2 preinstalled

DirectX9

Video settings: 1024 x 768 32bit colours

##### Pre installation:

ISIS Print software is protected with a 'dongle' that is programmed to work only with your software.

ISIS Print will only operate with your dongle attached to your computer (USB or Parallel port).

Please do NOT attach this dongle before running the installation CD as all the necessary dongle drivers are installed together with ISIS.

##### Installing ISIS Print:

Insert the ISIS installation CD into your CD drive and wait for the auto run setup to start.

If this fails to start, Open the CD (My Computer/your CD drive letter/ISIS) and double click 'setup'.

If your system does not have DirectX9 installed you will need to install this first. We recommend that you install this anyway, as it will search your system and update it as necessary.

After a 'Full' install of DirectX9 your system will automatically reboot. You will then need to re-insert the ISIS installation CD to install ISIS.

Install ISIS, following the on-screen directions.

ISIS Print will automatically be installed into your 'Resolutions' folder. If you do not wish to install this add-on, you should select 'Custom Install' in the setup program.

Primo PDF (PDF creator) can also be installed if desired.

If you do not have Acrobat reader as installed (needed for the PDF manual) you can install this from the CD. This is not essential as the manual is included.

You may also wish to install Primo PDF, which is a PDF creator. This will install as an invisible printer which will print (create) a PDF document of the opened file.

You can install Primo PDF from the Setup menu, following the on screen directions.

##### Using ISIS Print:

##### Start up:

When starting ISIS Print for the first time, you will see the main window (below).

If this fails to start, Open the CD (My Computer/your CD drive letter/ISIS) and double click 'setup'.

If your system does not have DirectX9 installed you will need to install this first. We recommend that you install this anyway, as it will search your system and update it as necessary.

After a 'Full' install of DirectX9 your system will automatically reboot. You will then need to re-insert the ISIS installation CD to install ISIS.

Install ISIS, following the on-screen directions.

ISIS Print will automatically be installed into your 'Resolutions' folder. If you do not wish to install this add-on, you should select 'Custom Install' in the setup program.

Primo PDF (PDF creator) can also be installed if desired.

If you do not have Acrobat reader as installed (needed for the PDF manual) you can install this from the CD. This is not essential as the manual is included.

You may also wish to install Primo PDF, which is a PDF creator. This will install as an invisible printer which will print (create) a PDF document of the opened file.

You can install Primo PDF from the Setup menu, following the on screen directions.

##### Open an Image & enter a report:

Selecting 'Open Image' lets you select the top image for your printed report. It will open the images from within the project you have selected.

Select an ISIS Image file then click on the 'Open/Create Project' button.

This example shows you the project named 'example' in the main 'Projects' folder. To change to another project, click 'Cancel' to close this window.

After selecting the image and click 'OK' to close the dialog window.

The other buttons (shown above) are self explanatory and function similarly to the 'Open', 'Next' and 'Previous' buttons as in 'IMAGE' and 'REPORTS' mode in ISIS Pro2.

##### Pre installation:

ISIS Print software is protected with a 'dongle' that is programmed to work only with your software.

ISIS Print will only operate with your dongle attached to your computer (USB or Parallel port).

Please do NOT attach this dongle before running the installation CD as all the necessary dongle drivers are installed together with ISIS.
